IN ADMIRATION OF MUSIC

OUR HISTORY AND ORGANISATION

At DALI, we're driven by a passion for music and the perfect reproduction of sound. By developing and evolving innovative technologies, we bring more realism to the home entertainment experience and create what we believe are the best loudspeakers in the world.

DALI, Danish Audiophile Loudspeaker Industries, was created in 1983 to meet the demands of Scandinavia's leading audio retail chain's customers, who were asking for loudspeakers that existing brands couldn't offer. DALI loudspeakers would offer outstanding performance and natural sound at competitive prices.

Inspired by a firm belief that we could create a unique sonic identity that focused on musical realism and sound integrity, we set out to redefine the reproduction of sound.

TECHNOLOGY MEETS CRAFTSMANSHIP

Every DALI product is the culmination of decades of experience within loudspeaker design. Featuring technologies like our patented Soft Magnetic Compound (SMC) driver magnet system, wood fibre cone material and signature hybrid tweeter module, DALI speakers let you experience your favourite music exactly as the artist intended it.

But DALI speakers are about more than just innovative technology. They're about a level of detail, style and finish that can only be achieved by combining the best of industrial design, Danish manufacturing and individual craftsmanship.

In Admiration of Music.
